

Connect the solar front to a testable plasma-state model

A. SUVI 195 Å · 15:55:34 UT
Measured image; proposed windows A-C

B. Full theoretical MHD fan
Assumed states; no measured event epoch

1 fast rarefaction · 2,6 Alfvén · 3,5 slow shocks · 4 contact · 7 fast shock
Windows A-C are not L_0/R_0 or recovered intermediate states. Across wave 7, test $R_1 \leftrightarrow R_0$.
